

SAVE THE DATE

Swiss-US Energy Innovation Days 2015

Aug 18-21, 2015
Zurich, Switzerland

General Focus: Integrated Building Systems – Innovation Potential and Business Opportunities

Specific Topics: Energy Technology, Architecture & Space, Mobility and Society

Target Groups: Companies, Universities, State Institutions and Organizations in the Energy / Building Sector

Programme: Workshops, Site Visits, Evening Receptions and Official Closing Event

Join representatives from innovative Swiss and US companies and universities, relevant state institutions and organizations to discover new opportunities in the Energy and Building Sector. Participate in thematic workshops and site visits on energy technology, architecture & space, mobility and society to explore and develop specific innovation and business potentials in these fields.

Present your ideas and recommendations in a high-ranked closing event with governmental representatives from Switzerland and the US.

Last but not least, learn more about doing business in Switzerland and the US and selected success stories and exchange contacts and experiences.

Mark your calendar now, more detailed information will follow soon!

The Swiss-US Energy Innovation Days are jointly organized by the Swiss Society of Engineers and Architects SIA and the Zurich University of Applied Sciences ZHAW and supported by the State Federal Office of Energy SFOE and Switzerland Global Enterprise S-GE.
